Summary

Motivated B.Tech graduate in Computer Science and Engineering (Data Science) with hands-on skills in Python, data analysis, machine learning, and backend API development. Familiar with REST APIs, MySQL, PostgreSQL, TensorFlow, OpenCV, and Power BI.

Technical Skills

Programming Languages: Python, SQL, HTML, CSS, JavaScript

Libraries/Frameworks: Pandas, NumPy, TensorFlow, OpenCV, Scikit-learn, REST API

Databases: MySQL, PostgreSQL

Tools/Platforms: VS Code, Git/GitHub, Excel, Postman, Jupyter Notebook, Power BI

Concepts: Machine Learning, Deep Learning, Computer Vision, REST APIs

Projects

Deep Learning Based Air Quality Prediction & Pollution Monitoring System

- Designed and developed an interactive air quality monitoring application using Python and Streamlit to analyze pollution data and predict Air Quality Index (AQI).
- Engineered data preprocessing and pollutant sub-index calculations for SO_2, NO_2, and SPM to assess air pollution levels.
- Implemented a Machine Learning model using Linear Regression and evaluated predictive performance using RMSE and R^2 metrics.
- Integrated interactive data visualization and automated SMS alert functionality to notify users of elevated pollution levels.

Technologies: Python, Machine Learning, Linear Regression, Pandas, NumPy, Scikit-learn

Tools: Streamlit, Matplotlib, VS Code, Jupyter Notebook

Academic / Internship Projects

- Data Engineering Virtual Internship
- Web Full Stack Developer Virtual Internship

Education

B.Tech – Computer Science and Engineering (Data Science)
Swarnandhra College of Engineering and Technology, Narasapur 2023 – 2026
CGPA: 7.06

Diploma (DME)
DNR College of Engineering and Technology, Bhimavaram 2020 – 2023
Percentage: 68.83%

10th Grade
Z.P.P. High School, L.B. Cherla, West Godavari 2017 – 2018
CGPA: 6.5

Certifications

- APSCHE – Full Stack Development (MERN)
- Python Programming – Web Full Stack Developer Virtual Internship
- WsCube Tech – Data Storytelling with Power BI
